DOH-CALABARZON FORMS TASK FORCE AMIDST RISING MEASLES CASES

The Department of Health in Calabarzon has created a task force to guarantee the implementation of the government's mass immunization drive against measles amidst rising cases in the region. .

In a statement, DOH Director for Calabarzon Eduardo Janairo said the measles task force will ensure that strategies and plans are carried out and, at the same time, address the needs of measles patients.

"We need to have a uniform strategy (in the mass immunization activity) espe-

Medical mission benefits Cavite town's indigents

NOVELETA , Cavite -- Thousands of poor patients and the elderly of this locality and neighboring Cavite City and Kawit town have benefitted from the three-day "mega medical mission" under the auspices of a United States-based medical corps.

At the culminating activity recently, Mayor Dino Reyes Chua, along with Vice Mayor Donnie Torres, Cavite City Vice Mayor Denver Chua, and local councilors, welcomed

Mayor Dino Reyes Chua
the kind-hearted Caviteños who are now based in California for not forgetting their roots.

GENTRI STEPS UP ANTI- RABIES DRIVE

GENERAL TRIAS CITY, Cavite -- The veterinary office here has stepped up its yearly anti-rabies campaign through massive vaccinations of pet dogs and cats in all 33 villages in the city, as preemptive move against the spread of the deadly disease and to ultimately achieve its goal of a rabies-free city.

City Agriculture Officer Neri Marquez said Wednesday that authorities are strengthening the city's dog-registration program and sustaining the mass anti-rabies vaccination in the city "to keep our dogs free from rabies infection that could be fatal to unwitting victims of dog bites."

Mayor Antonio Ferrer
"We encourage more dog owners to submit their dogs and cats for registration, especially this coming summer months when most students are on school vacation and their visiting friends are prone to dog bites," Marquez said.
The City Agriculture

Kamakailan lang, umabot sa 55 kabataan sa Metro Manila ang naiulat na namatay dahil sa sakit na tigdas o measles. Dahil dito, idineklara ng Department of Health na mayroong outbreak ng naturang sakit sa NCR, at kalaunan, sa Central Luzon.

Ang tigdas ay isang nakahahawang sakit dulot ng virus na sumisira sa respiratory tract o daanan ng paghinga bago kumalat sa buong katawan. Mas madaling mahawa rito ang mga sanggol at batang wala pa sa hustong gulang dahil hindi pa masyadong na-develop ang kanilang immune system. Ang sakit din na ito ay lubhang mapanganib para sa mga nagbubuntis dahil maaaring magkaroon ng matinding epekto sa sanggol na nasa loob ng kanilang sinapupunan.

Ayon sa World Health Organization (WHO), ang tigdas ay maaaring kumalat sa hangin at karaniwang naipapasa sa pamamagitan ng pagdikit sa mga taong may impeksiyon.

Nagsisimula ang sintomas ng tigdas sa mataas na lagnat, ubo, sipon, at pamumula at pagtutubig ng mata. Ito ay susundan ng mapupulang pantal sa balat na karaniwang kumakalat mula sa mukha patungo

2nd dose: 12 months old

DOH

[doh.gov.ph](#) [healthpromo.gov.ph](#) OfficialDOHgov

sa natitirang bahagi ng katawan.

Karaniwang kumakalat ang tigdas sa pag-ubo o pagbahing, pati na rin sa direktang pagkontak sa mga secretion o dagta mula sa ilong o lalamunan ng taong may sakit.

Maaaring ipasa ng may tigdas ang sakit sa ibang tao mula apat na araw bago lumitaw ang pantal, hanggang apat na araw pagkatapos ito sumulpot.

Base sa datos ng DOH, nagtala ng 169 kaso ng tigdas sa NCR mula Enero 1 hanggang Pebrero 6 ngayon taon, kumpara sa 26 kasong naitala noong 2018.

Sa 1,504 na pasiyenteng may tigdas sa San Lazaro Hospital, 1,355 dito ang mga batang may edad na lima at pababa.

Kadalasan, ang tigdas ay umaabot mula 7 -18 hanggang 21 araw.

Kapag ito ay hindi kaagad naagapan, maaari itong lumala at magdulot ng malubhang sakit sa

baga, bituka, utak, o kamatayan pero maaari itong maiwasan sa pamamagitan ng pagpapabakuna.

Ayon sa DOH, ang bilang ng pagbabakuna sa bansa ay bumaba sa 60 porsyento dahil sa kontrobersiyang dulot ng Dengvaxia vaccine na dapat ay panlaban sa dengue.

Samakatuwid, ilang mga magulang ay tinanggihan ang mga programang pangkalusugan na isinasagawa ng gobyerno, pati na ang mga libreng bakuna na maaaring pumigil sa mga sakit na tulad ng tigdas.

Babala naman ng WHO na kapag ito ay hindi pa rin nasolusyunan, ang Pilipino ay nasa peligrong magkaroon ng mga sakit tulad ng polio, pertussis, diphtheria, at iba pa.

Ang bakuna laban sa tigdas ay ang pinaka-epektibong hakbang sa pag-iwas sa tigdas.

“Importanteng muling maibalik ang tiwala

sa pagbabakuna at malinaw na ilahad na ang Dengvaxia ay walang kaugnayan sa kasalukuyang vaccination programs na noon pa man ay nagbibigay benepisyo sa mga nakakatanggap nito,” ani WHO country representative Gundo Weller.

Bagaman walang espesipikong gamot para sa tigdas, maaaring mag-reseta ang doktor ng antibiotics para mabawasan ang mga sintomas at para gamutin ang mga komplikasyong dulot ng virus.

Maaari ring maiwasan ang pagkalat ng tigdas sa pamamagitan ng pagpapanatiling malusog at malinis ang pangangatawan at kapaligiran. Kabilang na rito ang palagiang paghuhugas ng kamay, pagtakip sa bibig at ilong kapag umuubo o bumabahing, at pag-iwas sa mga taong nakikitaan ng sintomas ng sakit. (PIA Metro Manila)

Universal Health Care Act assures cover for all - PhilHealth

The Philippine Health Insurance Corporation (PhilHealth) confirmed recently that all Filipinos would surely receive health care services, without heavy financial burden due to costly treatments when the Universal Health Care (UHC) bill is signed into law by President Rodrigo Roa Duterte.

This was disclosed recently by Dr. Roy B. Ferrer, acting PhilHealth president, adding an encouraging note as the entire nation awaits the historic prospects when the UHC bill becomes a law.

The said bill was approved by both the Senate of the Philippines and the House of Representatives early last month, and was thenceforth transmitted to Malacañang last January 23rd. The President is expected to act on the bill in 30 days.

"We are on the verge of a new era not just for the health sector but for the entire country. It is only a matter of time that real and profound changes will take place that will surely be felt by our countrymen," Ferrer said.

The PhilHealth chief said that the UHC aims to automatically include all Filipinos in the National Health Insurance Program, and grant them immediate eligibility to claim the benefits when needed.

Ferrer revealed that over 100 million Filipinos are currently covered by PhilHealth. With UHC, the remaining six million of the population will soon be included and provided with health insurance.

The PhilHealth Chief added that the state health

insurer has mechanisms in place, so "it can truly fulfill the law's mandate, pending the issuance of the UHC law's implementing rules and regulations (IRR)."

"Non-members are assured that, under the UHC act, every Filipino will be treated by any PhilHealth accredited hospital," Ferrer declared.

The state agency also declared that soon after the UHC law's IRR is completed, all 106 million Filipinos can expect a better level of coverage and improved services from PhilHealth and from the country's entire health sector in general.

PhilHealth's Point-of-Service Program will enable patients to avail of PhilHealth's health care facilities, provided they are confined in government facilities. "Even women who are about to give birth are guaranteed coverage using the same process, whatever health facility they are admitted into," Ferrer said.

The PhilHealth top executive assured that active PhilHealth members remain fully entitled to their PhilHealth benefits.

By law, paying members such as those employed and self-paying, should continue remitting their premium contributions, Ferrer emphasized, adding that "this member support will ensure the stability of our fund."

"The poor and senior citizens remain covered as guaranteed by various laws for as long as they are qualified," Ferrer emphasized.(END)

'Sumilang' Festival 2019, a celebration of the faithful

SILANG, Cavite -- The 9th Sumilang Festival, which is celebrated in this historic town from January 20 to February 8, comes with pomp and pageantry but with more meaningful celebration for the town's 424th founding anniversary and homage to its patron saint "Our Lady of Candelaria".

Phillip Lacson Medina, chairman of the Sumilang Fiesta Executive Committee and member of the Silang Heritage Council, shared that this year's celebration also marked an event by the faithful community with the Episcopical coronation for the Blessed Mother of Silang by Bishop Reynaldo Evangelista of the Diocese of Imus on January 31.

Medina said the town was originally established as a parish on Feb. 3, 1595. Thus, present officials of the Silang Parish Council for Culture and Heritage (SPCCH) and the Parish Pastoral Council (PPC) filed a petition, through their Parish Priest Marty Dimaranan, before the Imus Bishop who granted the request for the Episcopal coronation in celebration of its 424 years as a parish.

"Credit also goes to various religious organizations with the barangay-based Basic Ecclesial Communities (BEC) who led the fundraising campaign from the faithful, and the proceeds were used to purchase the sterling silver fineries and regalia in honor of the Blessed Mother's devotion to the community of Silang," he added.

Medina described the solemn occasion spirited by the 120-strong choir composed of men, women and children as they led the congregation in the "Awit ng Papuri" (song of praise) as the coronation procession ensued.

As part of the ceremony, the community organizations offered two silver crowns to the bishop while a youth representative, as part of the church's observance for the "Year of Youth", brought the silver candle to the altar.

Medina said the sacred rites were amazing, bringing goosebumps to the congregation, as they witnessed Rev. Father Marty Dimaranan place the first crown to the Santo Niño image.

As Bishop Evangelista crowned the Blessed Mother, the parishioners chorused to rousing and joyful shouts "Viva de la Virgen de Candelaria! Viva Reina de Silang! (Hail to the Blessed Virgin of Candelaria! Hail to the Queen of Silang!).

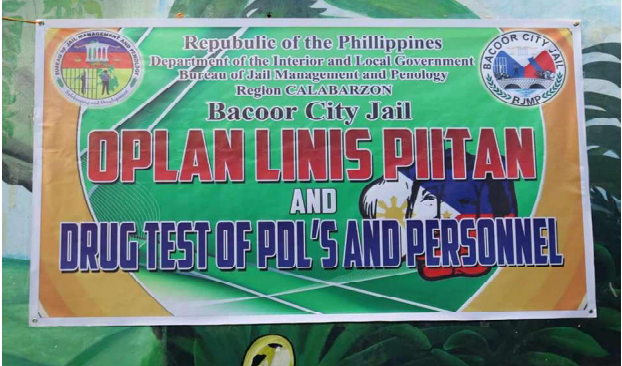

"It was an emotional pandemonium for the crowd as others gleefully cheered while others cried in joy," Medina said.

The traditional homage to the town's patroness "Our Lady of Candelaria" took centerstage during the 20-day festivities in the centuries-old church, which parish edifice complex showcases the Retablo Mayor and Mayores, or the votive altar pieces that were conferred as National Cultural Treasures (NCT), through a historical marker installed by the national museum.

Festival organizers said the annual Sumilang Fiesta is observed as thanksgiving for the bountiful fruit harvests in this agricultural but first-class town.source: (PNA)

Bacoor City..... Oplan Linis Piitan and drug test

The Department of the Interior and Local Government and the Bureau of Jail Management and Penology Calabarzon con-

ducted Oplan Linis Piitan at the Bacoor City Jail. At the same time, PDLs and BJMP personnel were given drug tests and HIV tests.

ture Office, which also supervises animal control, has seen the registration of some 17,793 dogs and 1,048 felines that were vaccinated in 2018 and is bent on increasing the record by at least 10 percent.

"Libre po ito para sa mga alaga nating aso at pusa. Ang pamahalaang lungsod po ay may kampanya sa anti-rabies

upang maging zero rabies case po ang ating lungsod (This is free for our pet dogs and cats. The city government is heightening its campaign for zero rabies case)," Marquez added.

Under the Anti-Rabies Act of 2007, all local government units (LGUs) are required to establish a central database system on the domesticated animal

population for the purpose of vaccination.

Meanwhile, Mayor Antonio Ferrer emphasized that a permanent and non-transferable registry shall be provided by the city government unit to all registered dogs and the registration is up for renewal yearly. (source:Dennis Abrina/PNA)

cially in the recording, reporting and monitoring of cases," Janairo said in a meeting on February 11 attended by local government health officers, national immunization program coordinators, and other officers involved in the campaign.

He added: "This is also to ensure that we have enough supply of vaccines at the local level including health human resources who will administer it to the target population."

Janairo said the task force will involve local government leaders and ensure that logistics are in place.

Based on the DOH's Regional Epidemiology and Surveillance Unit (RESU), at least 972 measles cases have been recorded in the region from January 1 to February 9, 2019 with 25 confirmed deaths or up by 683 percent compared to last year's 124 cases and 1 recorded death for the same period. The age of measles cases this year ranges from 9 months to 59 years old.

Records also showed of the 972 measles cases, 202 were vaccinated leaving 359 without vaccine; 192 were below 9 months old; and 174 have unknown vaccination status.

Rizal Province charted the highest number of measles cases with 465 followed by Laguna with 167, Batangas with 142, Cavite with 126, and Quezon with 72.

Meanwhile, the local governments have beefed up immunization activities to control the spread of measles.

In Antipolo City, the City Health Office has been conducting various Measles-Rubella Supplementary Immunizations in various barangays and sitios beginning January 28 and will continue until February 28.

Pililla town in Rizal will provide health reminders to various religious entities in the town such as the Roman Catholic Church, Iglesia ni Cristo, and Seventh Day Adventists, among others.

Places for vaccination will be assigned by the Pililla Municipal Health Office while various non-government agencies and schools have expressed support for the campaign and the Armed Forces of the Philippines will provide support for the immunization activities to be held in areas with armed conflict.

Vaccination sites will be set up in local fast food chains and churches during weekends complete with special vaccination card for identification while a house-to-house campaign will also take place in Pililla during weekdays.

In Laguna, the Provincial Health Office, led by Dr. Rene Bagamasbad, has started a catch-up immunization activity especially in affected communities and has coordinated with the DOH to prepare an Outbreak Response Immunization (ORI).

The Batangas Provincial Health Office has begun an information drive and encouraged parents to have their children vaccinated at the nearest city or municipal health units.

According to Myreen Valenzuela of the Batangas Provincial Disease Surveillance Office-Provincial Health Office, the age of children who can be given measles vaccines has been lowered from nine months to six months especially in Lipa City where the highest number of suspected cases were recorded.

In Cavite Province, the government will prioritize children six months to 59 months-old who have not yet been vaccinated according to Provincial Epidemiology Surveillance Unit and DOH Field Health Services Information System Coordinator Cristina Amulong.

In Lucena City, Quezon, the local government continuously conducts its vaccination activities in the villages according to Nurse III Elizabeth Caparos. Locally known as "tigdas," measles is a highly contagious virus that can spread through coughing and sneezing. It appears within 14 days after exposure to a person infected with the virus.

Symptoms include fever, dry cough, runny nose, red watery eyes, tiny white spots inside the mouth and skin rashes.

Janairo said there is no cure for measles but it can be prevented through proper immunization of children ages six months to 59 months old. (PIA4A pooled report, with reports from DOH-Calabarzon)

Medical...from p1

"Malaking tulong po ito para sa mga kababayan natin dito sa Noveleta at mga karatig na bayan, handog ng ating mga kababayang mga doctors na naninirahan na sa Amerika (This is a big help to our constituents here in Noveleta and neighboring towns, offered by our compatriot doctors who are now based in America)," Chua told the Philippine News Agency (PNA) in an interview.

Some 50 doctors and nurses from the Medical Association of Southern California provided free surgical removal of lumps and cysts during medical services held at the multi-purpose hall and evacuation center in Barangay San Jose 2 here from February 5 to 7.

The medical mission also extended free medicines to the patients.

Noveleta's Rural Health Unit head, Dr. Hilda Bucu, and her team of health professionals also assisted the visiting medical team and provided some equipment needed for the free minor operation.

Divine Mercy Reflection

The Mercy of Purification

Imagine if you could see your soul as God sees it. What would you see? How might God see your soul? Certainly He sees His precious child and looks at you with the greatest of love. But He also sees your sin, even the slightest sin. These sins, even the smallest imperfection, must be purged from within by His burning love. The Mercy of God becomes deeply "painful" in a spiritual way as it purifies. But this purification is necessary and is freeing. Purification must take place either now or through Purgatory. Choose the purification of God's merciful love now and you will not regret it (See Diary #36).

Reflect, today, upon God's love coming to you to purify your soul of every sin, even the smallest imperfection you may have. See this as an act of abundant Mercy. Be ready to feel the sweet pain of being purified and do not run from this. Your purification fills the Heart

of our Lord with immense joy!

Lord, help me to see my soul as You see it. Help me to let Your merciful gaze cleanse me of every sin. In Your compassion, dear Lord, replace the sin in my life with Your Mercy. And help me to never run from You. Jesus, I trust in You.
