

Pediatric vaccination for 5 – 11 years old launched in STRH

Bacoor City, Cavite (PIA) – The Department of Health (DOH) held the simultaneous launch of the Resbakuna Kids vaccination for children aged 5 – 11 years in Cavite on February 7 at the Southern Tagalog Regional Hospital (STRH) in Barangay Habay here.

DOH Undersecretary Roger P. Tong-An, Field Implementation Coordinating Team (Central and South Luzon) led the ceremonial launch along with DOH-CHD IV-A Regional Director Dr. Ariel I. Valencia and STRH Chief of Hospital, Dr. Ruby Ephraim M. Rubiano, 2nd District Representative Edwin 'Strike' B. Revilla, and Bacoor City Mayor Lani Mercado-Revilla.

USEC Tong-An allayed fears and doubts of guests, parents and around a hundred children as he spoke about the data collected globally encouraging the medical experts of the

DOH Undersecretary Roger P. Tong-An

Philippine Pediatric Society among others that no deaths attributed to vaccines were reported.

Local Government of Carmona

On February 5, Carmona Mayor Roy Loyola with Congresswoman Dahlia A. Loyola, Vice Mayor Cesar Ines Jr., and Council Members of the Town distributed cash load assistance to 1744 beneficiaries from Barangay 1 to 8 under the Cash Load Assistance Program or CLAP of the Government of the Town. They are students of public schools that are in the Learners' Information System.

This is a big help in distance learning for our students during this pandemic. Expect the continued support of the local government to our schools, teachers and students. For other barangay, just wait for the announcement from the Facebook pages of Municipality of Carmona, Cavite and your barangay.

Nationwide kids’ vax day mulled on February 14

MANILA – The National Vaccination Operations Center (NVOC) is mulling the nationwide rollout of pediatric Covid-19 vaccination for the 5 to 11 age group on February 14.

The planned Valentine’s Day activity will be held a week after Monday’s initial rollout in six vaccination sites in the National Capital Region (NCR).

Dr. Kezia Rosario, NVOC co-lead and medical specialist, said Saturday the pilot run will be expanded to 32 more vaccination centers in NCR – hospitals, malls, gymnasiums, and schools.

Each pilot site can cater to 500 vaccinees daily.

Five hospitals

in Central Luzon, three in Calabarzon, and one in Cotabato City will also begin their 5-11 age group vaccination next week.

"So ito po ay tinatawag nating pilot sites pa lamang kasi pinag-aaralan natin kung paano siya ma-implement nang maayos operationally so tinitingnan din natin kung saan mas magandang i-implement, Sa hospital lang ba or kasama na iyong mga eskuwelahan, iyong mga other vaccination sites sa ating implementation po (In this pilot run, we will study how to effectively implement it, operationally. So we are also looking at where should it better be implemented. Should it be in hospitals or should we include schools and other vaccination sites)," Rosario said at the Laging Handa public briefing.

Agricultural Training Institute/DA

FCAs nakatanggap ng van mula sa DA Calabarzon sa ilalim ng E-KADIWA

Tatlong farmers cooperatives and associations (FCAs) ang nakatanggap noong ika-3 ng Pebrero ng tig-iisang wing van na nagkakahalaga ng P2-M mula sa Department of Agriculture IV-CALABARZON (DA-4A) sa ilalim ng programang Enhanced KADIWA (E-KADIWA).

Ang mga nakatanggap ng truck ay ang Atimoya Farmers Association, General Trias Dairy Raisers Multi-Purpose Cooperative, at San Luis Farmers Association.

Layunin ng E-KADIWA Program na tugunan ang pangangailangan ng mga magsasaka at mangingisda na mapataas ang kanilang kita sa pamamagitan ng direktang pagdadala ng kanilang mga produkto sa pamilihan kung saan may siguradong mamimili at tugunan din ang pangangailangan ng mga mamimili na maka-kuha ng pagkaing abot-

rio said at the Laging Handa public briefing.

She added that the government will also analyze the vaccine acceptance of the children and their parents.

The government will initially allocate 1.5 million reformulated Covid-19 doses for the primary series.

The government-procured 780,000 doses of the Pfizer jab for the youngest age group arrived on Friday night.

kaya ang presyo.

"Ang CALABARZON ang pangunahing source ng mga pagkain sa Metro Manila. Dahil diyan ang ganitong programa ay napakahalaga. Pinapalakas nito ang ating kabakas sa sakahan. Nagpapas-

Another 780,000 may be delivered on February 9.

Party atmosphere

In San Juan City, kid-friendly decorations, mascots, candies, loot bags, and magic shows are in store for the children.

The FilOil Flying V Centre will be transformed into a party place with balloons, superheroes and cartoon character standees.

"These are all

alamat kami sa tatlong organizations na nandito. Sana patuloy tayong magkaroon ng maganda at matatag na ugnayan," ani DA Assistant Secretary for Operations at DA-4A Regional Executive Director Arnel V. de Mesa.

Sa pamamagitan ng mga naipamahaging truck, magiging mas madali para sa mga FCAs na iangat ang mga produkto ng mga magsasaka sa kanilang lugar. Malaking kabawasan din ito sa gastusin ng mga magsasaka dahil hindi na nila aalalahanin ang gastusin sa pagbababa ng mga produkto sa merkado dahil libre nilang magagamit ang mga ipinamahaging truck.

"Kami po'y nagpapasalamat sa Kagawaran ng Pagsasaka dahil nakikita namin na tinutulungan talaga nila kaming mga magsasaka. Makaaasa po kayo na iingat na papaunlarin namin ang binibigay nila," ani Anghel Perez, pangulo ng Atimoya Farmers Association. ##### (Reina Beatriz P. Peralta; Bogs De Chavez)

The city government will cater to 5,600 pre-registered children.

Walk-ins are strictly prohibited to avoid crowding.

DENR backs bill extending producers' plastic waste responsibility

Environment Secretary Roy A. Cimatu has expressed support for a recently passed Senate bill that aims to make manufacturers and producers accountable for proper management of their plastic packaging waste.

Cimatu said that the Department of Environment and Natural Resources (DENR) is in full support of the move to include Extended Producer Responsibility (EPR)

(EPR) in the two-decade-old Republic Act (RA) 9003 or the Ecological Solid Waste Management Act of 2000.

Senate Bill (SB) 2425 was passed on third and final reading on January 31 to institutionalize EPR, which will in effect amend RA 9003.

"We are supporting moves in Congress to amend the RA 9003, to institutionalize the prac-

tice of extended producer responsibility on plastic packaging wastes," Cimatu said during the celebration of the 21st anniversary of the signing of RA 9003.

The DENR chief explained that the amendment of the law would define EPR as a "practical approach on efficient waste management, waste reduction and development of environmentally-friendly

packaging products to promote sustainable consumption and production and the principles of a circular economy, and to emphasize the full responsibility of the producer throughout the products life cycle."

Moreover, he pointed out that "obliged companies" will also be required to observe suitable and effective "recovery, treatment, recycling or disposal" of their products which are sold to and used by the consum-

ers.

He also underscored the importance of including EPR in hazardous waste.

"We are also advocating the extension of producer responsibility to waste electrical and electronic equipment, which is another form of hazardous waste," Cimatu said. He noted that the DENR also supports initiatives in the legislature and promotes multi-stakeholder participation that would reduce marine litter towards a circular economy.

my.

"We are also supporting initiatives in Congress to reduce plastic wastes in our water bodies and to transition to a circular economy," he said.

"We need not just a whole-of-government but also a whole-of-society approach to reduce the residual waste stream to zero in the circular economy that we are pushing for," he added. ###

Pediatric vaccination...from p1

"We encourage parents to consult with their health care providers, before proceeding with the vaccination program, katulad po natin na nabakunahan, magkakaroon po sila ng protection against Covid-19 and makakabalik na po tayo sa face to face classes," stated Dr. Tong-an.

During the symbolic vaccination, Bacoor City Health Officer Dr. Ivy Marie Yraostroza led the vaccination and personally administered the Pfizer vaccine to the five-year old daughter of Deputy Speaker Strike Revilla, Chayelin Revilla.

The congressman fully supports the national government's CoVid-19 vaccination campaign program as he encourages all parents to have their children inoculated to get the protection against the risk of developing severe symptoms

of the disease.

"Almost two years na po tayo nakakulong sa bahay, ito po ang paraan upang malampasan natin itong pandemyang ito. Kaya po andito kame upang pangunahan at suportahan ang vaccination program ng gobyerno para sa kaligtasan ng ating pamilya," said Cong. Revilla.

A simultaneous kick-off activity for the

Resbakuna Kids: vaccination for children aged 5-11 years was held at the Batangas Medical Center in Batangas City for the CALABARZON region.

Another Pediatric (5 – 11 years) vaccination rollout will be held on Wednesday, February 9, 10am at the Skyranch, Tagaytay City. (Ruel Francisco, PIA-Cavite)

DOST, UP, Toronto experts developing new Covid-19 test kits

MANILA – A new testing kit to check for coronavirus disease 2019 (Covid-19) infection is expected to be developed by

May, according to the Department of Science and Technology (DOST).

DOST Secretary Fortunato de la Peña said the new kit will be a cell-based immunoassay for serologic testing.

"There are three types of tests available. The polymerase chain reaction testing and antigen testing can both test for active infection. Serological testing tests the antibodies against SARS-CoV-2 (severe acute respiratory syndrome coronavirus 2) and can detect whether a person was previously infected with Covid-19," he told the Philippine News Agency (PNA) on Monday night.

The project is being supported by the DOST-Philippine Council

for Health Research and Development (PCHRD) with funding worth close to PHP5 million.

The DOST-PCHRD-funded project, "Development of a Cell-Based Immunoassay for Coronavirus Disease 2019 (Covid-19) Serologic Testing", is led by Dr. Freshtel Monica Climacos of the University of the Philippines-Manila, together with collaborators from the University of Toronto, Canada.

In text messages to the PNA, Guiditta Gelera of PCHRD said the kit being developed would not need electricity.

"Results can be seen with the naked eye. This (kit) is for health care professionals' use since this requires blood sample," she said.

Gelera added the technology is scalable at the moment.

De la Peña said

the immunoassay method will be using engineered yeast cells to detect antibodies against SARS-CoV-2, the virus that causes Covid-19.

He said the project team had already made significant progress in using a cell-surface engineered yeast in an agglutination (clumping)-based immunoassay for the detection of antibodies against SARS-CoV-2 in human serum samples.

"This could be used in remote areas which lack sophisticated laboratory equipment and infrastructure," he said.

It would benefit communities, researchers, and clinicians determined to address local and global burdens of Covid-19, specifically in improving access to diagnostic tools for mass disease surveillance, de la Peña added. (PNA)

LRMC, contractor complete LRT-1 Cavite Extension viaduct

MANILA – The viaduct for the Light Rail Transit Line 1 (LRT-1) Phase 1 has been completed by LRT-1 private operator Light Rail Manila Corporation (LRMC) and project contractor Bouygues Travaux Publics (Bouygues).

In a statement on Monday (Feb. 7), LRMC president and CEO Juan Alfonso thanked project partners in the government and private sectors, noting that the project achieved “significant progress” despite limitations caused by the Covid-19 pandemic.

“LRMC is glad to welcome 2022 with this LRT-1 Cavite Extension accomplishment. I am proud of the commitment and sacrifice of all our teams, who displayed resilience amidst unsettling conditions and the determination to deliver with excellence,” Alfonso said.

During the ceremonial erection of the last span for the LRT-1 Cavite Extension Phase 1, Transportation Arthur Tugade said the project would provide “mobility, connectivity, and convenience” to commuters in Cavite and the southern part of Metro Manila.

“20 years ago, the government had a vision of putting a Cavite extension for the LRT-1 line. This was just a dream 20 years ago,” Tugade said.

He thanked the LRMC for continuing the project’s construction amid the Covid-19 pandemic and for the “active” collaboration of the local government of

Parañaque City. “I think it’s just appropriate that we salute LRMC. Pinakita ninyo ang pangangailangan na talaga na maganda ang (You have shown the need for good) partnership between the local government, private sector, and the national government,” Tugade said. Phase 1 of the

11.7-kilometer (km) LRT-1 Cavite Extension project covers a total of five stations—Dr. A. Santos, Ninoy Aquino, Asiaworld, MIA, and Redemptorist—is 67.5 percent complete as of end-December 2021, and is expected to be complete by late 2024 or early 2025.

SIM registration bill ‘new weapon against cyber criminals’

MANILA – Deputy Speaker Wes Gatchalian said the proposed Subscriber Identity Module (SIM) Card Registration Act could help law enforcement agencies in tracking down delinquents who use mobile phones with SIM cards to pursue nefarious activities.

Gatchalian made the statement after Congress ratified the report on House Bill 5793 and Senate Bill 2395, or “An Act Eradicating Mobile Phone, Internet Or Electronic Communication-Aided Criminal Activities, Mandating For This Purpose Ownership Registration Of All SIM Cards For Electronic Devices And Social Media Accounts.”

The measure is now awaiting President Rodrigo Duterte’s signature. Gatchalian, a principal author of the bill, said all public telecommunication entities (PTEs) shall require the registration of SIM cards as a pre-requisite to the sale and the activation of the subscription to deter the proliferation of SIM card, internet, or electronic communication-aided crimes.

These nefarious activities include terrorism, text scams, unsolicited, indecent or obscene messages, bank fraud, libel, anonymous online defamation, trolling, hate speech, the spread of digital disinformation or fake news.

“Indeed, we are grateful for the avowed support of the present leadership in fulfilling its legislative mandate to ratify this landmark measure, knowing the timely and vital role of information and modern communications technology at this time,” Gatchalian said.

Under the bill, all existing SIM card subscribers with active services shall register with their respective PTEs within 180 days from the effectivity of this proposal.

An extension period of no longer than 120 days shall be allowed upon a valid written request to the Department of Information and Communications Technology (DICT).

The failure of the subscriber to register shall authorize the PTE to automatically deactivate or retire the SIM card number. It is likewise the responsibility of the SIM card owner to report its loss or of any change in the information after registration.

“We change SIM cards as fast as we change our soiled shirts. Alarming, this seeming boundless stream of supply has become a magnet for nefarious and illegal activities. By requiring the registration of SIM cards, we promote accountability in its use and provide law enforcement agencies the tool to resolve crimes which involve its utilization,” Gatchalian said.

He said even the telcos themselves, as well as courier and delivery riders, are supportive of the push for mandatory SIM card registration.

The registration required under the measure shall be implemented at no cost to the end-users or the third-party resellers.

Gatchalian stressed that all data gathered pertinent to the registration shall be kept in compliance with the Data Privacy Act of 2012 and any breach or unauthorized disclosure of information shall be imposed the penalties prescribed in the bill.

The National Telecommunications Commission, in close consultation with the PTEs, social media providers, the Department of Trade and Industry, DICT, and the National Privacy Commission shall be among the government agencies which shall formulate the necessary guidelines in the proper implementation of the real-name registration program based on the parameters set by the measure. DOH LAUNCHES “RESBAKUNA SA BOTIKA” IN CALABARZON

The DOH-Center for Health Development-Calabarzon launches the “Resbakuna sa Botika” today at the Mercury Drug Store Q Plaza Promenade in Cainta, Rizal.

Health Undersecretary Roger Tong-An of the Field Implementation and Coordination Team (FICT Central and South Luzon) and Malasakit Program Office said that the Resbakuna sa Botika in Cainta, Rizal marks the beginning of a more intensified inoculation drive against COVID-19.

“We are glad that the “Resbakuna sa Botika” kicks off in Calabarzon Region as this will contribute to enhancing immune response to achieve a sufficient level of effectiveness against COVID-19. Pharmacies willing to open their doors to individuals who have completed a standard primary series can now provide access to an additional layer of protection against COVID-19, Undersecretary Tong-An emphasized.

“Sa ganitong programa, mas inilalapit pa natin sa publiko ang bakunahan laban sa COVID-19 para mas marami sa mga kababayan natin ang makatanggap ng booster dose,” he added.

A total of 90 individuals received their booster dose during the pilot implementation of “Resbakuna sa Botika” in the region.

Fully vaccinated individuals who want to avail of booster shot in pharmacies must pre-register and present their vaccination and identification cards subject to validation by the assigned pharmacists.

“Mas madali, mas kombinyente ito para sa mga kababayan natin na fully vaccinated na nais tumanggap ng booster dose. Kaya aming patuloy na panawagan, agad na tayong tumanggap ng booster shot upang mas mapataas pa ang proteksyon natin laban sa COVID-19,” Regional Director Ariel I. Valencia said.

Meanwhile, Assistant Secretary Maria Francia M. Laxamana extends her gratitude to Mercury Drug Corporation and the local government of Cainta for their support of the program.

“This is one of the ways forward of our campaign as we’ve seen during the pilot run of “Resbakuna sa Botika” in other regions, so we want to replicate that success in Southern Tagalog by enhancing and establishing partnerships with the private entities and local government units,” Asec. Laxamana stressed.

A total of 19,188,907 doses of COVID-19 vaccines in over 655 active vaccination sites were administered in Calabarzon on February 01, 2022; 8,978,547 individuals are fully vaccinated; 9,893,649 (77%) received their first dose; while 1,281,333 (14%) individuals have received their booster dose

Health Undersecretary Roger Tong-An (center) of Field Implementation and Coordination Team (Central and South Luzon) and Malasakit Program Office and DOH-Center for Health Development-Calabarzon Regional Director Ariel I.
